

Healthcare Assistance Program Summary

Blue Mountain Hospital (BMH) offers financial assistance to uninsured or underinsured individuals who need help paying for their medical bills for services received at our hospital. BMH is dedicated to making healthcare services available to all, regardless of age, gender, cultural background, ability to pay or otherwise.

Eligibility Requirement

To be considered eligible for our Healthcare Assistance Program, a Healthcare Assistance Application and the supporting documents must be completed and returned to BMH's Business Office at 802 south 200 west.

The size of your household and annual income will be used to determine what discount will be offered to you. An individual who qualifies for our Healthcare Assistance Program will not be charged more than amounts generally billed for emergency or other medically necessary care.

After review of submitted application, patients may be asked to apply for Medicaid before a decision for assistance is made. If the patient is denied Medicaid they will be asked for a copy of their denial letter.

How do I get an application?

An application can be found online at www.bmhutah.org, visiting our business office at 802 south 200 west and asking for an application, or by contacting Blue Mountain Hospital at 435-678-3993 and requesting an application. We can also assist you with completing the application and explaining potential discounts. Simply ask for help understanding our Healthcare Assistance Program – we are here to help you.

Translation Services

Blue Mountain Hospital has translated copies of the Healthcare Assistance Program, Healthcare Assistance Application and this summary document translated into Navajo. Additionally, Blue Mountain Hospital will make translation services available in the Business Office for Navajo speaking individuals who need further assistance. Other language translation services are also available upon request.
